Ryan Herco Products Corporation  
3010 N. San Fernando Blvd.  
Burbank, CA 91504

Re: European Union Compliance

Dear Michael,

We have been asked by several customers to document our compliance to the new European Union's directives for electrical equipment waste and restriction on hazardous materials in electrical equipment. Warren Rupp as a leading manufacture of air-operated double diaphragm pumps does not manufacture any electrical equipment that would have to meet the RoHS and/or the WEEE regulations. Warren Rupp does not have to comply with these directives.

Warren Rupp is a proud supplier of AODD pumps to Ryan Herco and we appreciate this opportunity to file this letter for your record.

Sincerely,

Paul R. Mills  
Global OEM Development Coordinator
